CASE STUDY: AKIITECH CONSULT

INDUSTRY: CONSTRUCTION

Akiitech Consult provide construction design management, and smart data consulting to building owners, operators, construction professionals, and facilities managers.

Kieran says

" I came to Formitize looking for an efficient way to get things done on site."

AKII.TECH CONSULT

Their solutions assist businesses optimize their built assets and reduce costs over time by capturing property related information within smart databases that connect to BIM (Building Information Models), Costing software, Construction Scheduling, and Facilities Management software. This data and the reports that are generated from it allows more informed design decisions, tighter costing, reduced construction risks, and lower operational costs.

Akiitech Consult marry cradle to grave construction technology solutions with people skills and building knowledge.

Their experts can structure, plan, and run workshops that tap stakeholder knowledge and foster mutual understanding and togetherness within your teams throughout the design and operation process. The information that comes out of these sessions is captured within a database that becomes the basis of the project. This information can be quickly interrogated, changed, and reported upon during the operational phase, giving building owners, operators, builders, and facilities managers more comprehensive control over their respective deliverables.

Formitize – making paperwork paperless.

Kieran states, "We were facing challenges in our business including:

- Inefficiencies
- Time delays
- Tedious, manual data entry

Kieran says, "I came to Formitize looking for an efficient way to get things done on site."

He relates, "Formitize provides a valuable contribution to how our business operates. Formitize paperless business solution is game changing – it has completely streamlined the way our business operates."
